Rectangular Waveguide Components

Complete Microwave Site Solutions From RFS

RFS offers a complete portfolio of the highest quality, best performing and most reliable elliptical waveguides and accessories in the industry

Radio Frequency Systems (RFS) is the originator and designer of continuous seam welded corrugated transmission lines. RFS' FLEXWELL® products – which have been used in thousands of successful installations worldwide – are the highest quality, best performing, and most reliable elliptical waveguides in the industry.

For more than 40 years, FLEXWELL elliptical waveguides have successfully supplemented traditional rigid rectangular and circular waveguide configurations for the transmission of RF energy at microwave frequencies. Available in a wide variety of premium and standard models, FLEXWELL is constructed of longitudinally continuous seam welded, highly conductive copper tube, corrugated and precision formed into an elliptical cross section. It is manufactured in continuous lengths using a special seam welding process developed exclusively by RFS.

RFS provides trusted and reliable solutions for all long haul, mobile, satellite and radar application needs through its broad portfolio of high quality FLEXWELL® Elliptical Waveguides, Connectors, Components, Tools and Pressurization Products.

With FLEXWELL, RFS customers benefit from:

- ⊕ Portfolio of elliptical waveguides that cover the entire range of microwave frequencies
- ⊕ Unique corrugation design for maximum strength and flexibility
- ⊕ Excellent electrical performance
- ⊕ Low attenuation and good return loss (VSWR as low as 1.06); highest average power
- ⊕ 24 hour pressure test performed on every waveguide
- ⊕ Reduced installation cost compared to rigid rectangular waveguides due to flexibility
- ⊕ Easy transportation in coils or on drums
- ⊕ Training and superior technical support

Additionally, RFS offers a full range of options, connectors, pressurization equipment and accessories to support your end-to-end radio link network. RFS offers tuneable connectors for premium performance waveguides and non-tuneable connectors for standard performance waveguides according to the EIA standard. These connectors are manufactured from brass forgings and are very simple and easy to install with basic hand tools, no expensive flanging tools are required. RFS connectors based on the IEC standard are all fixed tuned. Together with the dedicated flanging tools and premium performance waveguides, these connectors meet the highest VSWR / return loss requirements over the complete frequency band without tuning.

RFS offers the widest portfolio of standard and premium elliptical waveguides

FLANGING TOOL

RFS Twistflex Selection Guide

RFS twistflex is fabricated from spiral wound silver plated bronze strip. Includes pressure tight (15 psig) protective neoprene jacket. Allowable twist is 100°/ft for WR75 to 45°/ft. for WR229. Includes mounting hardware for one flange connection except, in cases where flanges are different on each end, hardware is supplied for both flanges. Standard lengths are 12", 24" and 36." Contact factory for special lengths.

RFS Dehydration Systems For Large, Medium and Small Capacity

Prevent moisture condensation and degradation in performance

The RFS digital dehydrator allows for increased system flexibility to suit individual customer requirements – easily configure options in the field as needed!

The APD-D Series Automatic Pressurization Dehydrator is available in standard system capacity and large system capacity models. The APD-D Series will provide reliable pressurization of elliptical waveguide, coaxial cable and rigid transmission line systems – and the new digital design will now enable easy on-site configuration of options such as humidity alarm, high pressure alarm, run time alarm and system purge.

The APD-D dehydrator includes a self-contained, completely automated air drying system that utilizes a pressure swing adsorption cycle to provide pressurized dry air while continuously purging the collected moisture to the atmosphere. It can be retrofitted into any existing RFS dehydrator installation, easily integrating with existing microwave antenna system equipment. It also supports easy option upgrades with no system downtime required by enabling options to be added to the base model or reset based on customer specifications in the factory or in the field by working with RFS.

For applications where only DC power is available, RFS offers medium and small capacity dehydrators operating with voltage between 48 and 60 VDC.

These fully automatic dehydrators are factory pre-configured and include low / high pressure, high humidity and system and power alarms. An optional module for remote monitoring over Ethernet is available. The LAB4 dehydrator has 4 pressure ports and the MINILAB is delivered with 6 pressure ports that can be individually opened and closed.

RFS APD-D DIGITAL DEHYDRATOR SERIES

LAB4DC-B DEHYDRATOR

RFS Pressurization Products

Complete End-To-End Solutions

A vast array products for installation, operation and maintenance

Gas Distribution Manifolds are used for pressure distribution to several transmission lines. They allow easy maintenance checks of individual lines. Includes 1/8" FPT input, distribution manifold block and one needle release valve. 0-15 psig pressure gauge, 15 ft. (4.5m) 3/8" plastic tubing for each outlet. Also included are four 3/8" plastic tubing racks (10 slots per rack), one roll of teflon tape and 24 nylon ties. Designate number of outlets by suffix number, i.e., GDM-2 for two outlets, GDM-4 for four outlets, etc.

Products for APD Dehydrator-Series

| Model Number | Description |
|-----------------------------|---|
| GDM-2 | Gas Distribution Manifold 2-ports |
| GDM-4 | Gas Distribution Manifold 4-ports |
| GDM-6 | Gas Distribution Manifold 6-ports |
| GDM-8 | Gas Distribution Manifold 8-ports |
| SHELF-APD-D | Shelf, Wall / Rack Mount for APD-D series dehydrators |

RFS offers all the necessary components to connect the LAB4 and MINILAB dehydrators to the waveguide connectors. A flexible butyl hose is available in 10m and 50m length with all necessary adapters and clamps for secure air connection.

Products for LAB and MINILAB Dehydrator-Series

| Model Number | Description |
|------------------------------|--|
| TUBE-01-010M | Butyl Hose, 6mm inner diameter, 10m length |
| TUBE-01-050M | Butyl Hose, 6mm inner diameter, 50m length |
| TUBE01-G18 | Tube Adaptor with G 1/8" thread for TUBE-01-xxxM |
| TUBE-SEAL | Teflon Sealing Tape |
| TUBE-0816 | Hose Clamp from 8mm to 16mm |

For waveguides with small air volume (< 2 liter) a humidity monitoring kit is deemed sufficient after filling the waveguide with dry air or nitrogen. For these applications RFS offers the cost-effective DC-Kits in several sizes. These kits can be used for 6m of RFS E105 waveguide and up to 75m of RFS E380 waveguide.

Desiccant cartridge Kits for moisture monitoring

| Model Number | Description |
|----------------------------|--|
| DC-KIT-B | For E100 to E220 |
| DC-KIT-220 | For E250 and connectors with PBR220 flange |
| DC-KIT-260 | For E250 and E300 with connectors with PBR260 flange |
| DC-KIT-320 | For E300 and E380 with connectors with PBR320 flange |

RFS Rectangular Waveguide Components Adaptors, Transitions, Twist and Bends

A complete portfolio for every type of deployment scenario

During site renovations, it is not uncommon to come across a mixture of different connector types or sizes between the antenna and the transmitter. For these cases RFS offers a large variety of rectangular waveguide components like flange adaptors, transitions, twist sections and E- and H-Bends.

IEC Components

| Component type | R | Flange 1 | Flange 2 | Plating | Color | Length, cm | Product Description |
|----------------|--------|----------|----------|---------|-------|------------|--|
| HB | 40-120 | -D | V | -1 | -B | | 90 degree H-Bend |
| | 84-320 | -B | W | | -B | | |
| EB | 40-120 | -D | V | | -B | | 90 degree E-Bend |
| | 84-320 | -B | W | | -B | | |
| TS | 40-120 | -D | V | | -B | | 90 degree twist section |
| | 84-320 | -B | W | | -B | | |
| SW | 70-84 | -D | V | | -B | -010M | straight waveguide section (other lengths available on request) |
| | 84-320 | -B | W | | -B | -010M | |
| FADP | 48-70 | -D | P | | -B | -005M | Flange adaptor |
| | 84-220 | -D | B | | -B | -005M | |
| NADP | 40-140 | -D | N-Female | | -B | | Waveguide to Coax adaptor |
| | 40-140 | -B | N-Female | | -B | | |
| TRAN | N/A | -D040 | -D48 | | -B | -010M | Transition from one waveguide size to another |
| | | -D070 | -D84 | | -B | -010M | |
| | | -D070 | -B84 | -B | -010M | | |
| | | -B84 | -B100 | -B | -010M | | |
| | | -B100 | -B120 | -B | -004M | | |
| | | -D120 | -D140 | -B | -004M | | |
| | | -B120 | -B140 | -B | -004M | | |
| | | -B140 | -B180 | -B | -004M | | |
| | | -B180 | -B220 | -B | -004M | | |
| | | -B220 | -B260 | -B | -004M | | |

EIA Components

| Component type | R | Flange 1 | Flange 2 | Plating | Product Description |

Why RFS?

Radio Frequency Systems (RFS) is a global designer and manufacturer of cable, antenna and tower systems, plus active and passive RF conditioning modules, providing total-package solutions for wireless outdoor and indoor infrastructure.

RFS serves OEMs, distributors, system integrators, operators and installers in the broadcast, wireless communications, land-mobile and microwave market sectors. As an ISO compliant organization with manufacturing and customer service facilities that span the globe, RFS offers cutting-edge engineering capabilities, superior field support and innovative product design. RFS is a leader in wireless infrastructure.

Serious about services

Customers know they can count on RFS for comprehensive logistical capabilities, flawless execution and outstanding technical skills and support. The company's dedicated shipment coordinators, hotline staff and on-site engineers go well beyond mere technology, striving to offer tailored solutions to meet even the most complex site-engineering and delivery challenges.

RFS' value-added services match the exact needs of business partners large and small.

Ever-present quality guarantee

From design to manufacture, ISO 9001 and ISO 14001 certification standards encompass all aspects of RFS' business worldwide. Every product RFS ships has stood up to the most stringent technical, environmental and quality control tests, continuously meeting and surpassing the expectations of a long list of wireless carriers, transportation and utility operators, and broadcasters.

RFS backs every product bearing its name with a quality guarantee that is unrivaled in the market.

A tradition of innovation

For over a century, RFS has been at the forefront of the wireless communication industry through its unwavering commitment to design and develop the world's most advanced technology in the field. Dedicated R&D teams, along with a privileged partnership with Bell Labs, are at the source of breakthroughs that are ensuring the mobility of an increasingly wireless world.

RFS is at the frontier of wireless technology innovation, sustaining the boldest ventures to enhance the way people communicate and live.

A truly global company

With on-the-ground personnel in more than 20 countries and on every continent, RFS always delivers on its commitments, providing a comprehensive range of premium products, systems and services. Its clients benefit from all the advantages of a global supplier, while relying on dedicated support from RFS' local engineering, manufacturing and shipping teams.

RFS' products, systems and personnel can be found in every corner of the planet. As a global group, RFS is committed to upholding the most stringent environmental, health and safety standards, and seeks to integrate green initiatives in every aspect of its business.
