

C BAND TRANSMIT

C-Band Receive Reject Filters			
16495	(5.85 - 6.425) GHz		
18323	(6.725 - 7.025) GHz INSAT Band		
C-Band Harmonic Lowpass			
16561	(5.85-6.425) GHz		This uplink filter suppresses potential regeneration of transmission between (11.7 – 25.7) GHz.
C-Band Multiband Reject			
18506	(5.925 - 6.425) GHz		This versatile transmit filter not only rejects the entire receive band (below 4.2 GHz), but it also rejects transmissions from other potential sources of interference, ... that RRFs do not.
